

Use of tools are Jira and Github which are shown below.

For testing such as dockerising the app and CircleCI that will be found in test execution and results document

Screenshots of Jira:

Below you can see sprint 1 burndown chart and sprint backlog for sprint 1

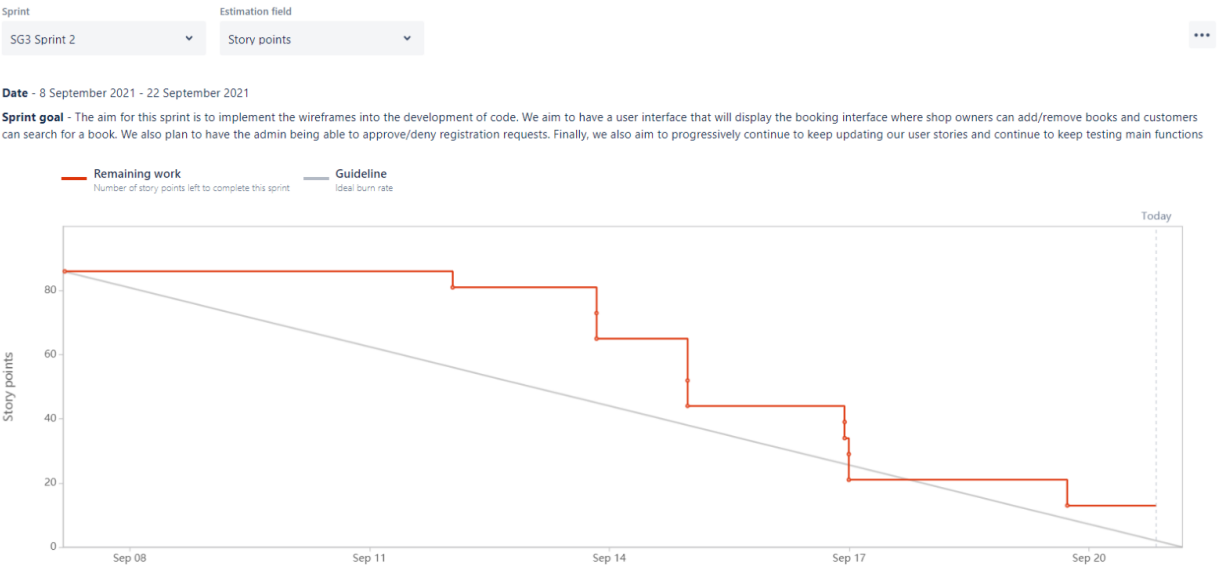

Note: Oliver's part where it says assigned to was completed by all other members of the team. I left it as Oliver just in case he returns and completes his tasks but unfortunately he didn't. So last minute, as a group completed the remaining tasks.

Note: please refer to sprint 1 retro notes for the explanation of the sprint burndown chart and was also discussed with Reza during our meeting.

Below you can see the sprint burndown chart for sprint 2 and the sprint backlog for sprint 2

Sprint burndown chart

Note: please refer to sprint 2 retro notes for an explanation of sprint burndown chart.

▼ Backlog (15 issues)		104	0	0	Create sprint
SG3-60	Admin can block users	5	TO DO	▼	👤
SG3-62	Admin can edit books	8	TO DO	▼	👤
SG3-72	Publisher/shop owner edit information about the book	5	TO DO	▼	👤
SG3-75	Publisher/shop can edit PayPal information	8	TO DO	▼	👤
SG3-80	Customer can place an order for a book using PayPal as a payment method	8	TO DO	▼	👤 ⋮
SG3-81	Customer can cancel an order within 2 hours of placing it	8	TO DO	▼	👤
SG3-83	Customer can view order status	8	TO DO	▼	👤
SG3-82	Customer can request for a refund on a book they ordered	8	TO DO	▼	👤
SG3-71	Publisher/Shop owner can mark books that are currently out of stock	5	TO DO	▼	👤
SG3-64	Admin can create and view a summary of transactions	8	TO DO	▼	👤
SG3-74	Publisher/shop can see a history of all transactions that have occurred through BOOKEROO	13	TO DO	▼	👤
SG3-84	Customer can view their transaction history	5	TO DO	▼	👤
SG3-65	Admin can generate a report about a day, month or year transactions	5	TO DO	▼	👤
SG3-79	Customer can review a book that he has purchased	5	TO DO	▼	👤
SG3-86	Customer can perform post/update/delete operations with their reviews	5	TO DO	▼	👤

This is the product backlog on Jira which shows the remaining user stories left to implement and will put into future sprint backlogs and be assigned to each member to complete. As shown above we are grooming the product backlog and put the highest user stories into the sprint burndown chart as planning and goals for future sprints.
